

Breast Ultrasound (Sonography) Initial Training

*Are you a mammographer looking to get trained in Breast Ultrasound?
Or perhaps a sonographer who would like to be more involved in Breast Imaging?
Get certified from the comfort of your own home today!*

Mammography Educators is excited to offer a 20-credit initial training course in Breast Ultrasound, including the 16 required structured education hours! All topics and categories listed by ARRT are included in this exclusive course. We offer the only online, self-paced initial training course taught by industry experts. Furthermore, our lectures are presented by nationally known and highly respected **radiologists** and **technologists** who have donated thousands of hours as volunteers to advance technologist education in the U.S. and at an international level. Learn from the experts who not only have the most advanced knowledge, but also share a passion for breast imaging!
